

SHIELD YOUR BUSINESS AGAINST CYBER THREATS

JOIN OUR MASTERCLASS  **30/06 - 01/07**

Building a Better Barrier: A Cyber Security Simulation

Get a complete rundown of various means to shield your business against the growing number of cybercrime on the internet. Individuals will be mentored on how to identify and anticipate different types of virtual threats and how to best protect their data against these malicious threats. This masterclass also guides individuals through simulations on detecting open ports, online malware testing, as well as email, passwords, and website security amongst other things.

The topics covered during the masterclass and simulation include:

- ✓ **Foot-Printing**
- ✓ **Port Scanning**
- ✓ **Malware**
- ✓ **Attack Identification & Types of Attacks**
- ✓ **Email Security**
- ✓ **Password Cracking & Prevention**
- ✓ **Website Security**
